

Supporting Student Mobility

Are you tired of hunting down paper copies of achievement records? Are you worried about forgeries? Do your students complain that their exchange studies aren't recognised? Do you wish to promote internationalization in your HEI?

EMREX will help you!

Some benefits of EMREX:

- Significantly increases the availability, quality and recognition of degrees and credits
- Diminishes the risk of forged transcripts and/or certificates
- Reduces the risk of overlapping studies
- Reduces the administrative workload
- Promotes student mobility

An exchange student returning home can retrieve his/her achievement data electronically

EMREX is the solution for electronic transfer of student records between higher education institutions in Europe. The project addresses the Bologna Process 2020 target that 20% of students within the European Higher Education Area should be mobile. The biggest benefits of EMREX will be the increased availability, quality and reliability of information about student achievement records.

From field trials towards a European solution

The transfer of student records will be tested live among students in Denmark, Finland, Italy, Norway and Sweden 2016-2017. Students participating in the field trial will log into their student portal at their home university and fetch study records from the host university.

The students will evaluate the solution and contribute to further improving it by participating in a user survey. The solution will also be evaluated by mobility coordinators and administrative personnel in ensure all aspects are considered.

Field trial in 2016-17

Denmark:

All universities for visiting students

Finland:

All HEIs for visiting students

Some HEIs with SMP

Italy:

University of Siena, University of Verona

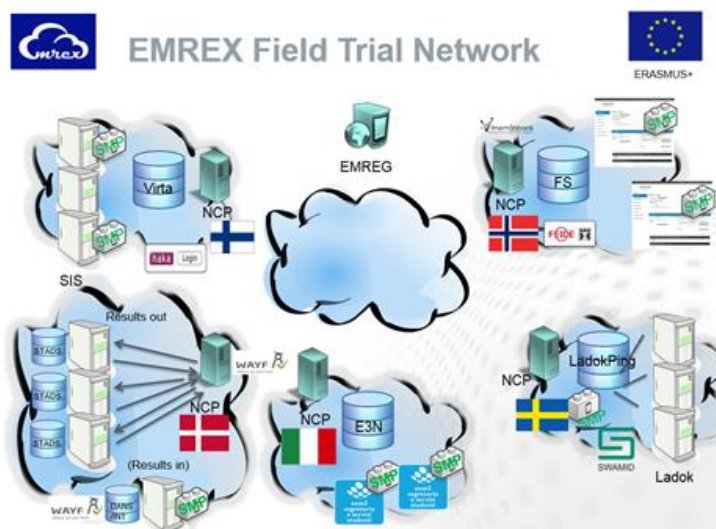

Norway:

All HEIs

Sweden:

All HEIs for visiting students

SMP during 2016

How do I get EMREX?

EMREX warmly welcomes HEIs to take part in the field trial or to join the EMREX group. It is possible to join the testing throughout the time period of the field trial. The components are also freely available to anybody interested in setting up a National Contact Point or Student Mobility Plug-in! For further information:
