TO WHOM IT MAY CONCERN

Erasmus+, the European Union programme in the field of education, training, youth, and sports, supports European activities in higher education institutions and will provide over 2 million higher education students the opportunity to study or train abroad between 2014 and 2020.

Student exchanges within Erasmus+ play a major role in providing young European citizens with relevant skills for their participation in society as well as widening student awareness of European values to build a creative, innovative and cohesive Europe.

Erasmus+ not only aims at increasing numbers; even more importantly, it supports innovative initiatives that aim at enhancing the quality and at facilitating the management of mobility, such as the EMREX project.

This project, funded under Erasmus+, aims at electronically exchanging student achievement data to facilitate recognition and information-sharing without the need to exchange paper documents. EMREX is working towards making paperless transfer of data a reality between higher education institutions at the request of the student/graduate.

The EMREX approach builds on existing infrastructure and is available to any interested higher education institution or national body through the cost-free sharing of the source code and implementation instructions. For more details on EMREX and on how to join, we invite you to visit the project website at www.emrex.eu.

The project is also arranging a free “EMREX is here!” seminar in Helsinki on January 31st, 2017 open to anybody interested in the project. (http://emrex.eu/?page_id=900)
